

## INVESTMENT OBJECTIVES

The Fund's two investment objectives are to provide long-term total return (the combination of yield and net price gains from the Underlying Funds) and to limit volatility and downside risk.

## BENCHMARK

Morningstar Tactical Allocation Category

## BENCHMARK DEFINITION

The Morningstar Tactical Allocation Category seeks to provide capital appreciation and income by actively shifting allocations across investments.

## MORNINGSTAR CATEGORY

Multisector Bond

## Fund Profile

### Experienced Investment Team:

Managed by an investment team with more than 115 years of collective experience managing private accounts in the same investment style.

### Well-Proven Risk Limiting Discipline:

Trailing stops are manually implemented under every individual holding, and are manually reviewed daily, in order to moderate any sustained losses to the portfolio.

### Access to Institutional Money

**Managers:** By utilizing multiple leading institutional money managers, Sierra provides another level of broad diversification and expertise in their investment styles.

AlphaCentric Income Opportunities Fund	3.5%
<b>Subtotal</b>	<b>50.3%</b>

## Fund Risk Disclosures

The Sierra Tactical All Asset Fund invests in underlying fund investments including mutual funds, closed-end-funds and ETFs. In some instances it may be less expensive for an investor to invest in the Underlying Funds directly. There is also a risk that investment advisers of those underlying funds may make investment decisions that are detrimental to the performance of the Fund. Investments in underlying funds that own small and mid-capitalization companies may be more vulnerable than larger, more established organizations to adverse business or economic developments. Investments in underlying funds that invest in foreign equity and debt securities could subject the Fund to greater risks including currency fluctuation, economic conditions, and different governmental and accounting standards.

Past performance does not guarantee future results and there is no assurance that the Fund will achieve its investment objectives.

**Unless otherwise noted, all information is from Morningstar as of December 31, 2019 for Instl Class Shares. Allocations, top holdings, fund performance and characteristics are subject to change without notice.**

## TERMS & DEFINITIONS

**Max Drawdown** is an indicator of the risk of a portfolio chosen based on a certain strategy. It measures the largest single drop from peak to bottom in the value of a portfolio (before a new peak is achieved) using month-end data.

**Beta** is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

**Standard Deviation** is a statistical concept used in investment management to measure risk for the variability of return of a fund's performance. A high standard deviation represents greater risk.

**Sharpe Ratio** uses standard deviation to measure a fund's risk-adjusted returns. The higher a fund's Sharpe Ratio, the better a fund's returns have been relative to the risk it has taken on.

**Downside Deviation** is a risk statistic measuring volatility. It is a variation of Standard Deviation that focuses only upon the "bad" volatility.

**Sortino Ratio** is a modification of the Sharpe Ratio that differentiates harmful volatility from general volatility by taking into account the Standard Deviation of negative asset returns, called Downside Deviation.

**Trailing Stops** are a special type of trade order where the stop-loss price is not set at a single, absolute dollar amount, but instead is set at a certain percentage or a certain dollar amount below the market price.

## ANNUAL OPERATING EXPENSES

	Instl Class
Management Fees & Other Expenses	1.48%
12b-1 Fees	—
<b>Total Annual Fund Operating Expenses</b>	<b>2.22%</b>
