

## INVESTMENT OBJECTIVES

The Fund's two investment objectives are to provide total return (with income contributing a significant part) and to limit volatility and downside risk.

## BENCHMARK

Bloomberg Barclays Municipal Bond Index

## BENCHMARK DEFINITION

The Bloomberg Barclays Municipal Bond Index is an unmanaged index that is considered representative of the broad market for investment grade tax exempt bonds with a maturity of less than a year.

BNY Mellon High Yield Municipal Bond - I	3.4%
AMG GW&K Municipal Enhanced Yield N	3.4%
Robinson Tax Advantaged Income Instl	1.9%
<b>Subtotal</b>	<b>99.6%</b>

## Fund Risk Disclosures

The Sierra Tactical Municipal Fund invests in underlying funds and ETFs that may invest in tax-exempt municipal bonds, as well as municipal money market funds. "Tax exempt" refers to the exemption from federal income taxes of the dividends paid by the Underlying Funds, a benefit that will be passed through to shareholders as to ordinary dividends from the Fund. In general, the price of a fixed income security falls when interest rates rise. Underlying Fund investments in lower-quality municipal bonds, known as high-yield or junk bonds, present greater risk of default than bonds of higher quality. Municipal securities are subject to the risk that legislature changes and economic developments may adversely affect the value of the Fund's investments. Shares of ETFs may trade at a discount or a premium in market price if there is a limited market in such shares and are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund. In some instances it may be less expensive for an investor to invest in the Underlying Funds directly.

Past performance does not guarantee future results and there is no assurance that the Fund will achieve its investment objectives. Current and future portfolio holdings are subject to risk.

## TERMS & DEFINITIONS

**Max Drawdown** is an indicator of the risk of a portfolio chosen based on a certain strategy. It measures the largest single drop from peak to bottom in the value of a portfolio (before a new peak is achieved) using month-end data

**Standard Deviation** is a statistical concept used in investment management to measure risk for the variability of return of a fund's performance. A high standard deviation represents greater risk.

**Sharpe Ratio** uses standard deviation to measure a fund's risk-adjusted returns. The higher a fund's Sharpe Ratio, the better a fund's returns have been relative to the risk it has taken on.

**Downside Deviation** is a risk statistic measuring volatility. It is a variation of Standard Deviation that focuses only upon the "bad" volatility.

**Sortino Ratio** is a modification of the Sharpe Ratio that differentiates harmful volatility from general volatility by taking into account the Standard Deviation of negative asset returns, called Downside Deviation.

**Trailing Stops** are a special type of trade order where the stop-loss price is not set at a single, absolute dollar amount, but instead is set at a certain percentage or a certain dollar amount below the market price.

## ANNUAL OPERATING EXPENSES

	Inst Class
Management Fees & Other Expenses	1.10%
12b-1 Fees	0.00%
<b>Total Gross Annual Fund Operating Expenses</b>	<b>1.68%</b>
<b>Total Net Annual Fund Operating Expenses</b>	<b>1.63%</b>

The expense ratios shown are as of January 28, 2021. Expenses include the underlying fund expenses. Please see the Fund's prospectus for more details.

The Total Annual Fund Operating Expenses includes the fees and expenses of the underlying funds, which are estimated at 0.58% per year. The Fund's investment advisor has voluntarily contracted to reduce its fees and/or absorb expenses until at least January 31, 2022 to limit expenses borne by the shareholder.
