

OVERALL MORNINGSTAR RATING™

The Tactical Core Income Fund – Inst Class was rated out of 286 Nontraditional Bond investments as of December 31, 2023. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

INVESTMENT OBJECTIVES

The Fund's two investment objectives are to provide total return (with income contributing a significant part) and to limit volatility and downside risk.

Fund Profile

Disciplined Risk Management: We believe in disciplined risk management. This includes a tactical approach, rules-based decisions, consistency, and a focus on limiting drawdowns.

Rules-Based Investment Process: We focus on trend following, broad asset-class diversification, securities exhibiting strong risk-adjusted returns, a Trailing Stop Discipline seeking to limit drawdowns, and the ability to move to 100% cash.

Team-Based Portfolio Management: Our investment management team has a combined 160 years of experience. All of our managers convene every day to review every asset class and every holding.

Benchmark Definitions & Fund Risk Disclosures

The Bloomberg US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market.

Portfolio holdings are subject to change and should not be considered investment advice.

The Sierra Tactical Core Income Fund invests in underlying fund investments in lower-quality bonds, known as high-yield or junk bonds, present greater risk than bonds of higher quality. Municipal securities are subject to the risk that legislative changes and economic developments may adversely affect the value of the Fund's investments. REIT risks include declines from deteriorating economic conditions, changes in property value, and defaults by borrower. Underlying funds that own small and mid-capitalization companies may be more vulnerable than larger, more established organizations to adverse business and economic developments. In some instances it may be less expensive for an investor to invest in the underlying funds directly. Underlying fund may invest in foreign emerging market countries that may have relatively unstable governments, weaker economies, and less-developed legal systems which do not protect investors. In general, the price of a fixed income security falls when interest rates rise. Any strategy that includes inverse securities could cause the Fund to suffer significant losses.

TERMS & DEFINITIONS

Standard Deviation is a statistical concept used in investment management to measure risk for the variability of return of a fund's performance. A high standard deviation represents greater risk.

Sharpe Ratio uses standard deviation to measure a fund's risk-adjusted returns. The higher a fund's Sharpe Ratio, the better a fund's returns have been relative to the risk it has taken on.

Downside Deviation is a risk statistic measuring volatility. It is a variation of Standard Deviation that focuses only upon the "bad" volatility.

Sortino Ratio is a modification of the Sharpe Ratio that differentiates harmful volatility from general volatility by taking into account the Standard Deviation of negative asset returns, called Downside Deviation.

Max Drawdown is an indicator of the risk of a portfolio chosen based on a certain strategy. It measures the largest single drop from peak to bottom in the value of a portfolio (before a new peak is achieved) using month-end data

ANNUAL OPERATING EXPENSES

	Inst Class
Management Fees & Other Expenses	0.94%
12b-1 Fees	—
Total Annual Fund Operating Expenses	1.41%

The expense ratios shown are as of January 30, 2023. Expenses include the underlying fund expenses. Please see the Fund's prospectus for more details. The Total Annual Fund Operating Expenses includes the fees and expenses of the underlying funds, which are estimated at 0.47%/yr

The Sierra Mutual Funds are distributed by Northern Lights Distributors, LLC, Member FINRA/SIPC.

Unless otherwise noted, all information is from Morningstar as of December 31, 2023. Allocations, top holdings, fund performance and characteristics are subject to change without notice.

Investors cannot directly invest in an index and unmanaged index returns do not reflect any fees, expenses or sales charges. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Tactical Core Income Fund – Inst Class was rated against the following numbers of U.S.-domiciled Nontraditional Bond funds over the following time periods: 286 funds in the last three years, 251 funds in the last 5 years, and 160 funds in the last 10 years. With respect to these Nontraditional Bond funds, the Tactical Core Income Fund received a Morningstar Rating™ of ★★★ for the three-year period, ★★★ for the five-year period and ★★★★ for the ten-year period.
