

OVERALL MORNINGSTAR RATING™

Out of 271 Nontraditional Bond funds as of December 31, 2018. An investment's overall Morningstar Rating™, based on risk-adjusted return, is a weighted average of its applicable three-, five- and ten-year (if applicable) Morningstar Rating™ metrics.

INVESTMENT OBJECTIVE

The Fund's two investment objectives are to provide total return (with income contributing a significant part) and to limit volatility and downside risk.

BENCHMARK

Bloomberg Barclays U.S. Aggregate Bond Index

BENCHMARK DEFINITION

The Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market.

Fund Profile

Experienced Investment Team:

Managed by an investment team with more than 115 years of collective experience managing private accounts in the same investment style.

Well-Proven Risk Limiting Discipline:

Trailing stops are manually implemented under every individual holding, and are manually reviewed daily, in order to moderate any sustained losses to the portfolio.

Access to Institutional Money

Managers: By utilizing multiple leading institutional money managers, Sierra provides another level of broad diversification and expertise in their investment styles.

DoubleLine Low Duration Bond Fund	5.0%
Nuveen Short Duration High Yield Municipal Bond Fund	5.0%
BlackRock Strategic Municipal Opportunities Fund	5.0%
Subtotal	75.0%

Fund Risk Disclosures

The Sierra Tactical Core Income Fund invests in underlying fund investments in lower-quality bonds, known as high-yield or junk bonds, present greater risk than bonds of higher quality. Municipal securities are subject to the risk that legislative changes and economic developments may adversely affect the value of the Fund's investments. REIT risks included declines from deteriorating economic conditions, changes in property value, and defaults by borrower. Underlying funds that own small and mid-capitalization companies may be more vulnerable than larger, more established organizations to adverse business and economic developments. In some instances it may be less expensive for an investor to invest in the underlying funds directly. Underlying fund may invest in foreign emerging market countries that may have relatively unstable governments, weaker economies, and less-developed legal systems which do not protect investors. In general, the price of a fixed income security falls when interest rates rise. Any strategy that includes inverse securities should cause the Fund to suffer significant losses.

Past performance does not guarantee future results and there is no assurance that the Fund will achieve its investment objective.

Unless otherwise noted, all information is from Morningstar as of December 31, 2018, for Class R Shares. Ratings, allocations, top holdings, fund performance and characteristics are subject to change without notice.

TERMS & DEFINITIONS

Max Drawdown is an indicator of the risk of a portfolio chosen based on a certain strategy. It measures the largest single drop from peak to bottom in the value of a portfolio (before a new peak is achieved) using month-end data.

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

Standard Deviation is a statistical concept used in investment management to measure risk for the variability of return of a fund's performance. A high standard deviation represents greater risk.

Sharpe Ratio uses standard deviation to measure a fund's risk-adjusted returns. The higher a fund's Sharpe Ratio, the better a fund's returns have been relative to the risk it has taken on.

Downside Deviation is a risk statistic measuring volatility. It is a variation of Standard Deviation that focuses only upon the "bad" volatility.

Sortino Ratio is a modification of the Sharpe Ratio that differentiates harmful volatility from general volatility by taking into account the Standard Deviation of negative asset returns, called Downside Deviation.

Trailing Stops are a special type of trade order where the stop-loss price is not set at a single, absolute dollar amount, but instead is set at a certain percentage or a certain dollar amount below the market price.

ANNUAL OPERATING EXPENSES

	Class R
Management Fees & Other Expenses	0.97%
12b-1 Fees	—
Total Annual Fund Operating Expenses	1.80%

Past performance does not guarantee future results and there is no assurance that the Fund will achieve its investment objective.

The performance quoted herein represents past performance for Class R Shares (SSIRX). For performance numbers to the most current month end, please call toll-free 1-866-738-4363 or visit our website, sierramutualfunds.com. Current performance may be lower or higher than the performance data quoted above. Past performance is no guarantee of future results. The investment return and principal value of an investment in the Fund will fluctuate, so that investors' share, when redeemed, may be worth more or less than their original cost.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund. This and other information about the Fund is contained in the prospectus and should be read carefully before investing. The prospectus can be obtained at sierramutualfunds.com or by calling 1-866-738-4363. The Sierra Mutual Funds are distributed by Northern Lights Distributors, LLC, Member FINRA/SIPC.

Unless otherwise noted, all information is from Morningstar as of December 31, 2018. Allocations, top holdings, fund performance and characteristics are subject to change without notice.

Cumulative performance from inception is the total increase in value of an investment in the Class R Shares assuming reinvestment of dividends and capital gains.

Investors cannot directly invest in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Sierra Tactical Core Income Fund - Class R Shares was rated against the following numbers of U.S.-domiciled Nontraditional Bond funds over the following time periods: 271 funds in the last three years and 177 funds in the last five years. With respect to these Nontraditional Bond funds, the Sierra Tactical Core Income Fund received a Morningstar Rating™ of 4 stars for the three-year and five-year periods, respectively. Past performance is no guarantee of future results.
